

1. เพิ่มข้อมูล

A screenshot of a Tkinter window titled 'tk' with a yellow title bar. The window contains a form with the following elements: a text entry field labeled 'name' which is empty; two radio buttons labeled 'male' (selected) and 'female'; a dropdown menu labeled 'age' which is empty; and two buttons labeled 'add' and 'delete'. To the right of the form is a large empty rectangular area.

A screenshot of the same Tkinter window 'tk'. The form is now filled with data: the 'name' field contains 'khuk'; the 'male' radio button remains selected; the 'age' dropdown menu now shows '10-15'. The 'add' and 'delete' buttons are still present. The large rectangular area on the right remains empty.

A screenshot of the Tkinter window 'tk' after the 'add' button has been clicked. The form fields are still filled with 'khuk', 'male', and '10-15'. In the large rectangular area on the right, the text 'khuk' has been added, indicating that the data from the form has been stored in a list or database.

2. លបខ្ញុំមូល

The image displays two screenshots of a Tkinter application window titled "tk". The window has a yellow title bar with standard minimize, maximize, and close buttons. The main content area is white and contains a form with the following elements:

- A "name" label followed by a text entry field containing the text "khuk".
- Two radio buttons labeled "male" (selected) and "female".
- An "age" label followed by a dropdown menu showing "10-15".
- Two buttons labeled "add" and "delete".
- A listbox on the right side of the window, which contains the text "khuk" in the top position.

The first screenshot shows the form with the "name" field filled with "khuk" and the "age" dropdown set to "10-15". The second screenshot shows the same form, but the "name" field is empty and the "age" dropdown is also empty.
